## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "1a" has been used to designate both a "support arrangement" and a "platform structure". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: the specification is replete with grammatical errors which include incorrectly punctuated sentences, improper word usage in sentences; and incomprehensible sentences. For instance, on Page 7, line 28, a --,-- (comma) needs to be inserted after "structure". Also on page 8, the last sentence on the page is not clear. These only represent a couple of the grammatical errors present in the application. The applicant is advised to carefully proofread his specification and to make any changes or correction as needed. Appropriate correction is required.

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the

Art Unit: 3635

"comprises" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear how the one or more recesses that are formed in the platforms "pass into" the open center" especially if the platforms project from the bottom surface of the surface structure. Clarification and correction is required.

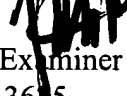

In claim 7, it is not clear how the frame open center receives at least one of the support projections when the support projections appear to be received in recesses formed at the corners of the frame. Clarification and correction is required.

*Allowable Subject Matter*

6. Claims 1-13 appear to be allowable. However, allowance is held in abeyance until receipt of claims overcoming the 35 U.S.C. 112 rejections noted above.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvonne M. Horton whose telephone number is (703) 308-1909.
